

32 rient donc ..

$$\frac{\partial}{\partial t} + h_0 \frac{\partial}{\partial x} u + h_0 \frac{\partial w}{\partial y} = 0. \quad (ii)$$

$$\frac{\partial w}{\partial t} + g \frac{\partial \delta h}{\partial x} = 0. \quad (iii)$$

$$\frac{\partial w}{\partial t} + g \frac{\partial \delta h}{\partial y} = 0. \quad (iii)$$

En dévivoit (i) par rapport à t. et (ii) l'à oc et (iii) //y. on a.

$$\frac{\partial^2}{\partial t} = \frac{\partial^2}{\partial t} + \frac{\partial^2}{\partial t} = 0.$$

* La conclition aux limites.

Sur le frontière du riserair la vitesse est mulle!

$$\left(\frac{\partial}{\partial l} - \overline{u}^{b} + g \nabla \delta h\right) \cdot \overline{m}^{b} = 0$$

Schema excolicite. · D = (0=+) \frac{1}{16} to M = (0=+) W 0= (266 1x + (26) 26 x) 22 - 42 16 le plo a cout: de rayon n=1. On considere un domaine circulaire se B. Methale numiniques.
